Title (optional) _____ First Name _____ Last Name _____

Position (optional) _____

Organization _____

Will Attend January 15 _____ January 16 _____ Both Days _____

Address (incl zip code)

Phone _____ Fax _____ E-mail _____

The focus of this regional workshop will be on providing education and information on sector allocation (allocation of quota to a group of fishermen to be fished in accordance with an approved plan) as a management tool, and exploring how this method might be applied to New England's quota-managed fisheries. The workshop is intended to answer questions on how sectors function, and to discuss the pros and cons of this approach. Presenters will include commercial fishermen, fisheries managers, government agency spokespersons, and members of the private sector and academic institutions.

The workshop is being organized by the Rhode Island Sea Grant Sustainable Fisheries Extension Program at the University of Rhode Island, in partnership with Sea Grant Extension Programs in Massachusetts, Connecticut, New Hampshire, and New York; the New England Fishery Management Council (NEFMC); NOAA Fisheries Science Center, Woods Hole and Northeast Regional Office; the Marine Affairs Institute, School of Law, Roger Williams University; Bradley Fund for the Environment; and Environmental Defense.
